

Aim and Scope

The Korean Society of Exercise Physiology (KSEP; <http://www.ksep.kr>) was founded in 1988 and currently has around 2,000 members. The Exercise Science (Exerc Sci), an official journal of the KSEP, was first issued in 1992 and currently has published 28 volumes. The aim of the Exerc. Sci. is to scientifically show the “scientific and clinical value of exercise in health and disease control”, provide evidence for this, consequently promote the development of elite sports, and improve the health of the general public. Therefore, Exerc Sci focuses on evidence-based scientific research of multidisciplinary studies, including physiology, biochemistry, nutrition, metabolism, genetics, immunology, medicine, rehabilitation, growth and development, training, anthropometry, and epidemiology related sport, physical activity, and exercise. The types of manuscripts include research articles, reviews, short/rapid communications, and case reports in the field of exercise science. For internationalization, we operate a separate “full English journal homepage” and a “submission evaluation system”. The Exerc Sci is an international, double-blind peer-reviewed and open access journal published quarterly (February 28, May 31, August 31, and November 30). Full texts are freely available from <https://www.ksep-es.org>. The Exerc Sci is also partially supported by The National Research Foundation of Korea (NRF).

CONTENTS

Volume 33 Number 4 November, 2024

Editorial

- 363 A Journey of Growth: Advancing the Future of *Exercise Science*
Ji-Seok Kim, Jinkyung Cho, Hyuntae Park

Review Articles

- 366 The Potential Protective Mechanisms of Exercise-Responsive Molecules in Chronic Kidney Disease
Jae Seung Chang
- 380 Potential Effects of Exercise-Induced Alterations in the Gut Microbiome and Its Metabolites on Cerebrovascular Health and Alzheimer's Disease
Da-Hui Sim, Dong-Hyun Lee, Jun-Hee Lee, Kwang-Seok Hong

Original Articles

- 390 Timing of Return to Pre-Pregnancy Training for Postpartum Elite Athletes: A Systematic Review and Meta-Analysis
Young-Min Park, Nyeonju Kang, Kwangseok Hong, Jinkyung Cho, Taekyung Han, Soo Hyun Park
- 399 Analysis of Research Trends in Exercise Science Using LDA Algorithm: Focusing on the Period from 2015 to 2024
Hyung-Keun Lee, Dong-woo Lee, Hye-Soo Cho, Dong-Min Kwak
- 409 Collagen Gene Variants and Anterior Cruciate Ligament Rupture in the Korean Population
Ki-Hoon Seong, Kwang-Jun Kim, Hee-Jung Park, Byung-Hoon Lee, Eunwook Chang, Dong-Ho Park
- 415 Gait and Health-Related Physical Fitness Cut-off Values for Osteoporosis in Elderly Women
Min-Jun Kim, Inhwan Lee
- 423 Listening to Music Can Reduce Calorie Intake and Increase Satiety: A Systematic literature Review and Additional Pilot Study
Ah-Ram Kim, Jae-Won Kim, Na-Young Kim, Ho-Seong Lee
- 436 Associations between Metabolic Syndrome, Grip Strength, and Depressive Symptom among Community-Dwelling Older Adult: A Cross-Sectional Study
Youngyun Jin, Taewan Kim, Kunho Lee, Donghyun Kim
- 447 Comparison of Anthropometric and Physical Fitness Variables Based on Gender and Position in Elite Field Hockey Players
Jane Kim, Hee-Jung Park, Do-Youn Kim, Su-Jin Kim, Dong-Ho Park

CONTENTS

Volume 33 Number 4 November, 2024

- 458 Lifelong Exercise Mitigates Aging-Induced Clk2 Elevation and Attenuates Fatty Liver in Mice
In-Gyu Kim, Kyung-Wan Baek, Ying-Ying Xiang, Jong-Hwa Won, Ji Hyun Kim, Ji-Seok Kim
- 468 Exercise Does Not Prevent Thermoregulatory Adaptation to Cold Stress During the Winter Season
Dae-Hwan Kim, Min-Hyeok Jang, Jean-Hee Han, Jung-Hyun Kim
- 477 Impact of Physical Exercise on the Executive Function and Mental Health of Heroin Addicts
Chun-lu Fang, Guo-Hua Zheng
