

Aim and Scope

The Korean Society of Exercise Physiology (KSEP; <http://www.ksep.kr>) was founded in 1988 and currently has around 2,000 members. The Exercise Science (Exerc Sci), an official journal of the KSEP, was first issued in 1992 and currently has published 28 volumes. The aim of the Exerc. Sci. is to scientifically show the “scientific and clinical value of exercise in health and disease control”, provide evidence for this, consequently promote the development of elite sports, and improve the health of the general public. Therefore, Exerc Sci focuses on evidence-based scientific research of multidisciplinary studies, including physiology, biochemistry, nutrition, metabolism, genetics, immunology, medicine, rehabilitation, growth and development, training, anthropometry, and epidemiology related sport, physical activity, and exercise. The types of manuscripts include research articles, reviews, short/rapid communications, and case reports in the field of exercise science. For internationalization, we operate a separate “full English journal homepage” and a “submission evaluation system”. The Exerc Sci is an international, double-blind peer-reviewed and open access journal published quarterly (February 28, May 31, August 31, and November 30). Full texts are freely available from <https://www.ksep-es.org>. The Exerc Sci is also partially supported by The National Research Foundation of Korea (NRF).

CONTENTS

Volume 34 Number 1 February, 2025

Editorial

- 1 The Challenges of *Exercise Science*
Seung-Soo Baek

Review Articles

- 3 Overuse Injury in Youth Athletes by Sport Specialization and Latest Trends in Neuromuscular Training to Prevent Overuse Injury:
A Literature Review
Keun-Ok An, Kwang-Jin Lee
- 10 Prevention of Hamstring Injuries in Elite Football Players: Exercise and Load Management Strategies
Donggi Kim, Minchul Lee

Original Articles

- 20 Changes in Physical Activity and Cognitive Function of the Elderly Due to COVID-19 in South Korean
Eunjae Lee, Seung-Taek Lim
- 28 Incidence and Management of Severe Muscle and Tendon Injuries in Elite Korean Badminton Players: A Focus on Gender-Specific Patterns
Munku Song, Sangcheol Yoo, Kwangnam Kim, Chaofan Chen
- 35 Physical Activity as a Mediator in the Relationship Between Oral Health Status and Prevalence of Diabetes in Older Adults
Min-Jun Kim, Taewan Kim, Youngyun Jin, Donghyun Kim
- 45 Association Between Liver Fibrosis and Physical Activity with Bone Mineral Density in Korean Adults
Jiho Shin, Young-Min Park, Youngyun Jin, Yoonhwan Kim, Taewan Kim, Jinkyung Cho
- 54 Comparative Study of Stationary Stand Type and Mobile Seated Type Tests for Visual-Motor Coordination Assessment in National Fitness 100
Sung-eun Park, On Lee
- 60 Exploring the Influencing Variables for Frontside Air Reverse in Professional Female Surfers: A Case Study
Sabin Chun, JongChul Park, JoongHyun Ryu, Hokyung Choi
- 71 The Effects of 8 Weeks of Moderate-Intensity Aerobic Exercise on Serum Irisin and Leptin Levels in Obese Women in Their 20s
Tae-Hyung Lee, Jae-Myun Ko
- 81 Analysis of Association between Appendicular Skeletal Muscle Mass, Physical Performance and Mechanical Properties of Lower Extremity
Muscles in Older Women
Gi-Chul Ha, Kun-Ho Lee
